SUBJECT INDEX TO VOLUME 16

Abdominal trauma, mesenteric artery branch avulsion from blunt, 172–174
Abscess, retained sponges and, 259–262
Abstracts, 65–69, 138–143, 214–219, 282–287
Acquired immunodeficiency virus, children and, 145–151
Addison's disease, tubercular adrenalitis and computed tomography, 102–108
Angiography
  Castleman's tumors and, 239–242
  magnetic resonance
    review of, 152–167
    thyroid cysts and, 198–200
  renal infarction vs. tumor in, 129–133
Ankylosing spondylitis
  cervical fracture in, 31–33
  scintigraphy of sacroiliac joints, 230–233
Arterial injuries, pseudoaneurysm of hepatic artery, 175–179
Arteriography
  carotid, nasal obstruction and, 134–136
  cerebral, dural carotid-cavernous fistulas and, 263–268
Arthropathies, metabolic, 1–14

Basal ganglia, calcification, 145–151
Bile ducts, inspissated bile simulating cholangiocarcinoma, 190–193
Biliary obstruction, inspissated bile simulating cholangiocarcinoma, 190–193
Bladder rupture, spontaneous, 247–249
Blockade, pseudoaneurysm of hepatic artery and therapeutic, 175–179
Bone tumors, 168–171
Bones, scintigraphy of sacroiliac joints, 230–233
Book reviews, 62–64, 137, 209–213, 279–281
Bowel ulceration, seminoma of testis and, 201–203
Brain
  arteriography of, 93–97
  congenital anomalies of spine and, 73–88
  congenital disease of, 93–97
  magnetic resonance imaging of, 93–97
  neoplasm, 250–255
  tomography, computed, of, 93–97
  vascular disease of, 93–97
Breast cancer, inflammatory, 183–186
Bronchogram, postobstructive fluid, 109–113
Bronchus-associated lymphoid tissue, acquired immunodeficiency virus in children and, 145–151

Calcification
  basal ganglia, 145–151
  leiomyoblastoma and, 194–197
  soft tissues, 49–51
Calcium, tumoral calcinosis and renal dialysis, 49–51
Cancer
  breast, inflammatory, 183–186
  testicular, bowel ulceration and, 201–203
Carotid pseudoaneurysm, thyroid cyst vs., 198–200
Castleman's tumors, hyaline vascular type, 239–242
Cervical spine, ankylosing spondylitis and, 31–33
Cholangiocarcinoma, inspissated bile simulating, 190–193
Clavicle lysis, posttraumatic, 40–42
Common bile duct, inspissated bile simulating cholangiocarcinoma, 190–193
Congenital disorders, imaging of brain and spine, 73–88
Craniocerebral hemiatrophy, magnetic resonance imaging of, 93–97
Crystal deposit diseases, metabolic arthropathies and, 1–14
Cystography, retrograde, bladder rupture and, 247–249

Duodenum, seminoma of testis and ulcerating mass of, 201–203

Enucleation, ocular prostheses and, 243–246

Fistulas, dural carotid-cavernous, magnetic resonance imaging vs. computed tomography of, 263–268
Flow patterns, angiography, magnetic resonance, 152–167
Foreign bodies
  lung parenchyma and bamboo, 117–120
  tomography and, 256–258
  ultrasound and, 256–258

Gadolinium, ocular prostheses and, 243–246
Ganglioneuroma, magnetic resonance imaging of adrenal, 37–39
Giant hepatic artery pseudoaneurysm, computed tomography and, 175–179
Glands, adrenal
  magnetic resonance imaging of adrenal ganglioneuromas, 37–39
  tubercular adrenalitis and computed tomography, 102–108

Headaches, leukemia, acute myelogenous, and, 272–276
Hematoma, mesenteric artery branch avulsion and retroperitoneal, 172–174
Hemopericardium leading to cardiac tamponade, computerized tomography and pediatric, 180–182

Hepatic arteries, pseudoaneurysm of, 175–179
Hepatitis, radiation, 89–92
Hydroxyapatites, ocular prostheses and, 243–246

Inflow effects, magnetic resonance angiography, 152–167
Injury
  abdominal, 172–174
  clavicle and, 40–42
  kidney, 129–133
  knee, 43–48
  plantaris muscle rupture imaging, 55–58

Joint, sacroiliac, scintigraphy of, 230

Kaposi's sarcoma, acquired immunodeficiency syndrome in children and, 145–151
Kidney
  renal infarction vs. tumor with injury of, 129–133
  tumoral calcinosis and renal dialysis, 49–51
Knee, anterior cruciate ligament injury, 43–48

Leg, plantaris muscle rupture imaging, 55–58
Leiomyoblastoma, computed tomography and, 194–197
Leukemia
  meningioma and acute myelogenous, 272–276
  pulmonary lesions and, 15–24
Ligaments
  anterior cruciate, 43–48
  posterior cruciate, 43–48
Liver, radiation hepatitis, 89–92
Loose bodies, synovial osteochondromatosis of the ankle and magnetic resonance, 34–36
Lung diseases, pulmonary lesions with leukemia and lymphoma, 15–24
Lymphadenopathy syndrome, acquired immunodeficiency syndrome in children and, 145–151
Lymphocytes, syphilis and, 125–128
Lymphoma
  mononucleosis, infectious, and, 114–116
  pulmonary lesions and, 15–24

Magnetic resonance imaging
  anterior cruciate injury and, 43–48
  congenital anomalies of brain and spine and, 73–88
  craniocerebral hemiatrophy and, 93–97
  dynamic study, 187–189
  fistulas, dural carotid-cavernous, and, 263–268
  magnetic resonance angiography review, 152–167
  medulloblastoma and, 250–255
  meningioma and, 272–276
  ocular implants, coralline hydroxyapatite, and, 243–246
  plantaris muscle rupture imaging, 55–58
  plasmacytoma, hepatic, and, 98–101
  radiation hepatitis and, 89–92
  renal infarction vs. tumor and, 129
  shoulders, asymptomatic and, 25–30
  sponges, retained, and, 259–262
  superior vena cava syndrome and, 269–271
  synovial osteochondromatosis of the ankle and, 34–36
  vision loss and, 204–205
Medulloblastoma, magnetic resonance imaging and, 250–255
Meningioma, radiation-induced, 272–276
Merkel cell carcinoma, computed tomography and, 52–54
Mesenteric artery avulsion, traumatic inferior, 172–174
Metabolic arthropathies, 1–14
Mononucleosis, computed tomography and infectious, 114–116
Multiple myeloma, hepatic plasmacytoma and, 98–101
Muscle, plantaris muscle rupture imaging, 55–58

Nasal obstruction, 134–136
Neoplasm
  brain, 250–255
  magnetic resonance imaging of adrenal ganglioneuromas, 37–39
  Merkel cell carcinoma and computed tomography, 52–54

Nodule, syphilis and pulmonary, 125–128

Ocular prostheses, vascularization of, 243–246
Osteochondromatosis, synovial, magnetic resonance findings in ankle, 34–36

Pediatrics
  acquired immunodeficiency virus in, 145–151
  hemopericardium leading to cardiac tamponade, 180–182
Phase images, magnetic resonance angiography, 152–167
Phase subtraction, magnetic resonance angiography, 152–167
Pheochromocytoma, dynamic magnetic resonance imaging and neoplasm-extraadrenal, 187–189
Plasma cells, syphilis and, 125–128
Plasmacytoma, magnetic resonance imaging of hepatic, 98–101
Pleural fissures, computed tomography, 221–229, 277–278
Pseudoaneurysm, thyroid cyst vs. carotid, 198–200
Pulmonary consolidation, computed tomography fluid bronchogram and, 109–113

Radiation
  magnetic resonance imaging of radiation hepatitis, 89–92
  meningioma from, 272–276
Radiography, plain, 168–171
Radionuclide studies, sacroiliac joints and, 230–233
Rectal mass, syphilis and, 125–128
Renal artery, renal infarction vs. tumor, 129–133
Renal failure, metabolic arthropathies and, 1–14
Retroperitoneum
  Castleman's tumors and, 239–242
  pheochromocytoma, extraadrenal, and, 187–189

Sacroilitis, scintigraphy and, 230–233
Schwannoma, adrenal tumors vs. retroperitoneal, 121–124
Sclerosis, posttraumatic clavicular, 40–42
Scrotal mass, ultrasound and, 59–61
Seminoma of the testis, bowel ulceration and, 201–203
Shoulder, magnetic resonance imaging and, 25–30
Skin, Merkel cell carcinoma and computed tomography, 52–54
Soft tissues
  calcification, 49–51
  giant cell tumor of bone soft tissue recurrence, 168–171
Spine, congenital anomalies of brain and, 73–88
Spirochete, syphilis and, 125–128
Splenic infarction, infectious mononucleosis and, 114–116
Sponges, retained, 256–258, 259–262
Superior vena cava syndrome, magnetic resonance imaging vs. computed tomography and ultrasound in, 269–271
Surgery, retained sponges, 256–258, 259–262
Syphilis, pulmonary nodule in secondary, 125–128

Testicular cancer, bowel ulceration and, 201–203
Testis, seminoma of, 201–203
Thorax, bamboo foreign bodies in lung parenchyma, 117–120
Thyroid, magnetic resonance angiography and thyroid cyst, 198–200
Time-of-flight, magnetic resonance angiography, 152–167
Tomography, computed
  bamboo foreign bodies in lung parenchyma, 117–120
  brain and, 93–97
  bronchogram, postobstructive fluid, 109–113
  cancer, inflammatory breast, and, 183–186
  Castleman's tumors and, 239–242
  cervical fracture in ankylosing spondylitis, 31–33
  congenital anomalies of brain and spine and, 73–88
  fistulas, dural carotid-cavernous, and, 263–268
  hemopericardium leading to cardiac tamponade and, 180–182
  inspissated bile simulating cholangiocarcinoma, 190–193
  leiomyoblastoma and, 194–197
  meningioma and, 272–276
  Merkel cell carcinoma and, 52–54
  mesenteric artery branch avulsion, traumatic inferior, 172–174
  nasal obstruction and, 134–136
  pleural fissures, 221–229, 277–278
  posttraumatic lesions of clavicle and, 40–42
  pulmonary lesions with leukemia and lymphoma and, 15–24
  renal infarction vs. tumor and, 129–133
  scrotal mass and, 59–61
  sponges, retained, and, 256–258
  superior vena cava syndrome and, 269–271
  tubercular adrenalitis and, 102–108
  tumoral calcinosis and renal dialysis, 49–51
  vision loss and, 204–205
Trauma
  bamboo foreign bodies in lung parenchyma, 117–120
  blunt abdominal, 172–174
  clavicle lesion and, 40–42
  renal infarction vs. tumor after, 129–133
Tuberculosis, tubercular adrenalitis and computed tomography, 102–108
Tumors
  adrenal, 121–124
  bone, 168–171
  Castleman's, 239–242
  gastric, 194–197
  giant cell, 168–171
  retroperitoneal, 121–124
  schwannoma vs., 121–124
  seminoma of testis, 201–203

Ultrasound
  inspissated bile simulating cholangiocarcinoma, 190–193
  plantaris muscle rupture imaging, 55–58
  scrotal, 59–61
  sponges, retained, and, 256–258
  superior vena cava syndrome and, 269–271

Velocity quantification, magnetic resonance angiography and, 152–167
Vision loss, diagnosis of, 204–205
